International Wraps: Our options for International orders are to ship the wrap in the boat when the boat is shipped to the international dealer or directly to the dealership. We do not handle and/or warrant the installation of the wraps outside the US; all installations for all International orders are the responsibility of the dealer... we include detailed directions and an installation guide w/each wrap. We're available to your local installer to consult and answer questions; these installs are very technical and require a skilled professional 3M installer. We can send you the install directions for you to interview and find the qualified installer for the wrap.
